- Team Work
- Calm
- Fast Learning

LANGUAGE

- English B2

ABOUT ME

I am İbrahim, a 3rd year university student. I am currently doing a voluntary internship at D1 tech company and also working as a freelancer. I had the opportunity to intern at three different companies and improve myself. In my first internship, I learned WordPress and PHP and developed a website using WordPress. In my second internship, I learned Java and SpringBoot and developed a program that performs Crud operations. In my current internship, I am trying to learn and apply everything about software testing. Apart from these, I created an aviation-related website using HTML, CSS and JS. I learned C/C++ Python languages at university and made various simple projects. I'm currently learning Django and developing a site with my own CV. I also attend cyber security training.

EXPERIENCES

-DATABASE ASSISTANT-
BurtiNet - İstanbul - 2022
August to October

I learned how to create a website using WordPress during my time at BurtiNet. I also gained experience in checking and editing website databases using PHP. Additionally, I had the opportunity to observe the provisioning of server and hosting services.

-DATA SPECIALIST-
Spordata Information Technology Management- İstanbul - 2022 November to -

As a freelancer in Spordata company, I have been doing data collection work for more than 1 year. I follow sports from almost every branch, collect data instantly and enter it into the system. While working in this company, I improve my English as I have to be in constant contact with abroad, I also work with excel tables and I work with a team constantly.

-JAVA DEVELOPER INTERN-
Solvia Digital Solutions- İstanbul - 2023
August to September

During my mandatory internship at Solvia company, I extensively utilized Java. Throughout this internship, I underwent training in Java and SpringBoot. I successfully developed a SpringBoot project that executed CRUD operations. Additionally, I gained hands-on experience with MySQL Database and Postman. Moreover, I actively engaged with APIs as part of my responsibilities.

-TEST ENGINEER INTERN-
